Dave:

fyi: I've forwarded a draft of the Pineview permit to the PTP contractor.

b5

It's a bit rough with some loose ends, but the heavy lifting is done. Once I get their feedback I'll work w/ Rich to get it in shape for your review.

Emmanuelle and I had a long day yesterday.....I made her eat her lunch at the wheel of her car as we drove between sites. Both Redwood Valley and Big Valley have started construction to replace their wastewater disposal systems. And both are doing a "fantastic" job.....really quite remarkable given conditions at the sites just 3 months ago. I'll provide more details later, but we should be extremely pleased w/ their efforts: top-notch for sure!

Subject: draft permit

Hi Brenda:

Attached is a copy of the preliminary draft permit for Pineview. Much is not in order w/ re: to Table of Content, formatting, etc. However, the bulk of the permit and monitoring requirements are substantively there, and that's what I need comments on. Again, it would be good if you could make sure that the Robinsons have a look at this also.

I'm going to explore a bit more w/ regard to setting limits for BOD and SS in the effluent, and Nitrate in the groundwater, so these particular elements of the permit are potentially not firm. I'll know more in a week or so.

Let me know if you have any Qs, and let's stay in touch. Aaron
